

Production of VESTA™ heat exchangers

Aalborg Industries manufactures its many types of VESTA™ shell & tube heat exchangers in the Group's own boiler factories in Denmark and China.

Factory locations

Aalborg Industries manufactures its many types of VESTA™ shell & tube heat exchangers in the Group's own boiler factories in Denmark and China. The heater production at Aalborg Industries' factory in Indonesia was discontinued when this factory closed at the end of 2006.

Production in China

Heat exchanger production in Jiaozhou near Qingdao was set up at the end of 2006 in new premises at the boiler factory. The production staff has undergone extensive training in processing of the various materials and in the welding methods involved in the comparatively thinner and sometimes different materials used for shell & tube heat exchangers as compared to the steam boilers which the factory has manufactured since being established in 1974. Aalborg Industries Ltd. is a private limited company

Aalborg Industries' marine boiler and heat exchanger factory in Jiaozhou near Qingdao, China.

owned 100% by Aalborg Industries in Denmark. The factory has around 600 employees and is located in new premises that have expanded considerably every year since being acquired by Aalborg Industries in 1994.

In 2007, more than 1,000 marine boiler units will be delivered from the factory, mainly to China, Korea and Japan, while the production of heat exchangers is estimated at around 1,500 units for delivery world-wide.

The factory in China will build most of the heat exchanger types engineered by Aalborg Industries and has already acquired most of the major classification Type Approvals such as LRS, GL, CCS, NK, KR, ABS, DNV, BV, RINA and RMRS.

Production in Denmark

Aalborg Industries has had its own team of heat exchanger builders since the company acquired the Danish company A/S Vesta in 1993. The factory in Aalborg manufactures all types of the VESTA™ shell and tube heaters for customers around the world and has a very broad range of classification society Type Approvals.

The company in Denmark has manufactured steam boilers since 1919 and has a staff of around 550.

VESTA™ MX oil preheater manufactured at the factory in China

Production in China

Aalborg Industries' corporate headquarters, heat exchanger business centre and factory in Denmark.

The annual number of marine boiler and thermal fluid heater units from the factory totals 300 while around 3,500 heat exchanger units and 400 oil/gas-fired burners are delivered.

Engineering

All layout, engineering and sales of the Aalborg Industries Group's heat exchangers takes place at the head office in Denmark.

Long-term customers have access to a calculation programme that enables them to calculate their own heat exchangers by keying in a few specific data.

The Heater business centre in Denmark is available with sound advice and guidance as to the best solutions for customer requirements as well as a competitive pricing policy.

The VESTA™ brand

The VESTA™ brand name is derived from the Danish company A/S Vesta which was established in 1914 and was acquired by Aalborg Industries in 1993. A/S Vesta began manufacturing heat exchangers in the 1940s. According to Roman mythology, Vesta was the goddess of the hearth fire.
