

## Replacement kit for TSX17 PLC

*Aalborg Industries has developed a new, upgraded PLC equipment as replacement for the TSX17 PLC*

*Aalborg Industries continually strives to satisfy the expectations of our customers. As part of this, we direct our efforts to keeping at the forefront of technological development and offering the best solutions with regard to replacement parts.*

### New PLC replacement kit

As the availability period for spare parts for PLC equipment type TSX17 has ended, we have developed a new, upgraded version of PLC equipment in order to fulfil your requirements in the best way. For that purpose we have developed a package solution consisting of replacement kit, programmed EPROM and updated electrical drawings.

The replacement kit consists of:

- 1 x CPU unit
- 1 x flash EEPROM
- 3 x 16 INPUT
- 3 x 16 relay UD 24 V DC

- 1 x standard rack
- 1 x power supply for 100 / 240V AC
- 6 x universal connection blocks

The EPROM included in the replacement kit will be programmed based on your existing EPROM.

### Separate units

The replacement kit has a new and up-to-date design which means that the CPU and the terminal are two separate rack-mounted units. This allows you to separately replace the CPU and the terminal, which are also sold on a separate basis.

### Installation and adjustment

As the PLC equipment includes the boiler sequence - and safety system - adjustment of the PLC program is required in connection with the installation of the replacement kit. Our service engineers are able to adjust and test the PLC equipment according to the ship's local conditions and thus ensure the safety and reliability of the plant.

### Contact us

For technical assistance or further information about this new replacement kit, please contact one of our sales assistants. For contact details, refer to the back of this newsletter.

# Boiler Spares Solutions

*OEM spare parts supply  
... year round, 24 hours a  
day, all over the world.*

**Your advantages are competitive prices and added values such as:**

- Viable solutions to any boiler problems you may experience
- Quick response time (within 24 hours)
- Genuine, OEM spare parts
- Comprehensive stock
- Short delivery time and correct delivery

These added values are some of the parameters that we can offer you daily.

**The Aalborg Industries Group:**

*Comprehensive stock  
and reliable, on-time  
delivery*

*We endeavour to offer  
the best solutions for  
the needs of our custo-  
mers*

Boiler Spares Solutions is published by the Aalborg Industries' Marine After Sales and deals with spare parts solutions for boiler plants.
